Program Topic: “The “Bear” Basics of Managing Extreme Risk”

Think, **P**lan and **A**ct is a proven process for managing extreme risk in any situation: First Responders use it all the time and save lives every day. It is a systems approach to managing stress, with the goal of preserving the ability to think under extreme pressure.

Greg has used this system to save hundreds of lives throughout his 31 year career in the rescue and fire service, as well as antiterrorism. In addition, utilizing the system of Think, Plan, and Act saved Greg’s life when he was brutally mauled by a 600 pound Grizzly deep in the interior of Alaska. The system is simple, effective, and easily learned.

Who knows one day it could save your life.

Takeaways:

- Understanding the importance of continuing to think during extreme risk situations
- Using the Think, Plan, Act process to make effective decisions
- The ability to maintain mental and physical function in extreme situations in order to survive

Speaker: **Gregory J Matthews**, Chase What Matters

- Greg Matthews has been a risk manager for all of his adult life. After serving in the USAF, he spent 33 years refining his skills to protect and serve this country and her citizens.
 - His careers and accomplishments span fire & rescue service, EMT, Rescue Helicopter Pilot, Fugitive Recovery Agent, Homeland Security Manager and Antiterrorism officer to name a few.
 - If asked, his crowning achievement was spending 4 years developing a national emergency service and rescue system in the remote jungles of Uganda East Africa.
 - Greg is married to his wife Rhea of 16 years and has three children.
-

Tutorial 1 (General): “Risk Management – An Overview”

Risk management is the process of analyzing exposure to risk and determining how to best handle such exposure. Risk management process undertakes a best practices approach and focuses on understanding the key risks and managing them within acceptable levels. It is a collaborative process where risk response plans are developed in concert with the stakeholders who understand the risks and are best able to manage them.

This session provides an overview of Risk Management Process, discuss Threats and Opportunities in relation to Risk, and explore the categories of Risks organizations are typically exposed to.

During this session, the group will review the steps to establish a risk management plan and develop response plans to eliminate, minimize or mitigate risks. Provides practical approaches, best practices and examples to developing Risk Management Plans.

Speaker: **Satya Kudapa**, Business Advisor TMAC. TMACdfw.org

- Satya has more than eight years of experience providing professional coaching, mentoring and implementing Quality Management Systems, Lean Six Sigma Principles and Project Management.
